

## **EXTREME POWDER GEAR: HOME OF THE X-RACK**

### **ExtremePowderGear: Home of the X-RACK**

Snowmobiling is one of the greatest snow sports ever invented. The sport has grown by leaps and bounds and is only getting bigger. Skiing and Snowboarding are more popular now than ever, with Pro's taking it to a whole new level. Imagine combining the best snow sports in the world to create the Ultimate Snow Experience.

Extreme Powder Gear has made it possible for Skiing, Snowboarding and Snowmobiling riders to come together. The fusion of these sports is made possible through X-RACK technologies by Extreme Powder Gear.

EPG has created a system that is convenient for carrying your SKIS, BOARDS and any other equipment you might need for the Backcountry snowmobile, snowboarding/skiing experience. Any skier or boarder has stood at the top of the resort looking out of bounds to see endless powder, untouched steeps and awesome cliffs. X-RACK makes that terrain accessible to anyone with a snowmobile and the guts to ride there. Now the only question is what will be better... the ride up or the ride down?

### **The X-RACK**

**The X-RACK** ski rack was designed by some of the top "Snow Riders" in the Wasatch Mountains, home of the best powder in the world. The X-RACK was designed with one goal, the fusion of man and machine. Imagine throwing your skis or snowboards on a snowmobile, flying up to the highest peak and bombing down that dream run, fresh track, and wide open spaces for the ride of your life!

X-RACK provides an easy and reliable way to carry your SKIS and SNOWBOARDS on your snowmobile without getting in the way of the rider or passenger. Your X-RACK also has room to strap on your ski boots, extra gas or anything else that you want to bring up the mountain with you. X-RACK system allows for a snowmobile to take 2 pairs of skis or 2 snowboards up on the mountain with you. Forget the backpacking them in! Just throw them on the rack and fly up the mountain. X-RACK's are designed to carry your ski equipment for you but if you need to pack on something else like extra food, fuel or your camera equipment just strap it on your rack and you are ready to ride.

### ***FUNNER UP OR DOWN?***

Backcountry skiing has always been a coveted sport for those that are willing to hike in. Don't waste your day trudging up the mountain. Go up on an 800cc screaming snowmobile! Hey might as well have fun on the way up too!

### ***HELI-WHAT?***

Heli-Skiing has only been available for those with the serious cash. Now you can make your local mountains your own ski resort. Imagine riding on untouched powder all day every day...and you're the pilot!
